

△CS Layer 7

Governance-Level Invitation/Exclusion Layer

Triangulated Coherent Systems — Apex Governance Authority

Document ID	△CS-GOV-L7-GLIEL	Version	1.0
Status	Active	Effective Date	July 2026
Classification	Governance Framework — Restricted	Layer Designation	GLIEL — Layer 7 (Apex)
Supersedes	None (Initial Issue)	Review Cycle	Annual (Sovereignty Review)
Custodian	GLIEL Chair / GLIEL Secretariat		

APEX GOVERNANCE NOTICE

This document constitutes the apex governance instrument of the Triangulated Coherent Systems (△CS) framework. The Governance-Level Invitation/Exclusion Layer (GLIEL) holds the highest positional authority within the △CS governance stack. No △CS layer, body, or instrument supersedes the decisions issued under this document. All entities operating within △CS are bound by the provisions herein. External challenge mechanisms are exclusively defined in the △CS Founding Charter.

1. Layer Identity

Attribute	Definition
Layer Designation	Governance-Level Invitation/Exclusion Layer (GLIEL)

Attribute	Definition
Layer Number	Layer 7 — Apex (highest altitude in the Δ CS governance stack)
Abbreviation	GLIEL
Function	Governs the sovereign structural decisions of Δ CS — determining which entities, disciplines, governance bodies, frameworks, and participant classes are invited into, or excluded from, the governance architecture. Holds final authority over membership, recognition, and structural belonging within Δ CS.
Position in ΔCS Stack	The apex layer. Sits immediately above the Governance-Level Evaluation Layer (Layer 6). Receives evaluation intelligence from Layer 6 and the entire cross-discipline stack. No Δ CS layer sits above it; external challenge mechanisms are exclusively defined in the Δ CS Founding Charter.
Layer Below	Governance-Level Evaluation Layer (Layer 6)
Layer Above	None within Δ CS
Authority Class	Sovereign — decisions are final within Δ CS

2. Purpose and Scope

2.1 Purpose

The Governance-Level Invitation/Exclusion Layer (GLIEL) is the constitutional authority of the Triangulated Coherent Systems (Δ CS) framework. It is the layer that determines the conditions under which any entity, discipline, governance body, or participant gains or loses standing within the system.

Invitation and exclusion are the most consequential decisions in any governance architecture. Invitation defines the boundaries of the

community; exclusion enforces the integrity of those boundaries. The GLIEL exercises this authority with deliberateness, transparency, and procedural rigor — recognising that these decisions carry structural, relational, and institutional consequence that no other layer within Δ CS is positioned to bear.

This layer is not an operational or evaluative body. It does not conduct the day-to-day governance of Δ CS, nor does it perform assessments of entity performance. Those functions reside in the layers below. The GLIEL acts only on the basis of fully deliberated evidence, procedurally complete submissions, and — where evaluation intelligence is required — formal outputs from the Governance-Level Evaluation Layer (Layer 6).

2.2 Scope

The GLIEL holds authority over all of the following decision categories:

1. The **recognition and admission** of disciplines, governance bodies, frameworks, external partners, and participant classes within Δ CS.
2. The **suspension** of a participant's standing, on a time-bound and condition-specific basis.
3. The **reinstatement** of a suspended participant, upon satisfaction of defined conditions.
4. The **formal exclusion** of any entity from the Δ CS governance architecture, on any grounds defined in this document.
5. The **structural integrity of the governance stack itself** — including the creation, merger, suspension, or dissolution of governance layers.
6. The **periodic self-review** of GLIEL authority exercise, conducted through Sovereignty Reviews.

SCOPE CLARIFICATION

The GLIEL does not govern the internal operations, outputs, or performance of any Δ CS layer or entity. Those functions are governed by the relevant layer-level instruments and, at the governance level, by the Governance-Level Evaluation Layer (Layer 6). The GLIEL acts exclusively on matters of membership, standing, and structural architecture.

3. Core Functions

3.1 Invitation Protocol Management

The GLIEL governs the process by which new entities are formally invited into the Δ CS governance architecture. Invitation is a structured, multi-stage process requiring formal nomination, dossier preparation, panel deliberation, and ratified registration. The full Invitation Protocol is set out in Section 6.

Invitation categories recognised by the GLIEL are as follows:

Code	Invitation Category	Description
(a)	Discipline Invitation	Recognition of a new discipline within the Δ CS framework as a recognised field of governance participation.
(b)	Governance Body Invitation	Establishment or formal recognition of a new governance body with defined standing and function within Δ CS.
(c)	Framework Invitation	Formal adoption of an external framework or methodology into Δ CS operating standards, conferring recognised status within Δ CS

Code	Invitation Category	Description
		governance processes.
(d)	Partnership Invitation	Recognition of an external entity as a Δ CS governance partner, with defined rights, obligations, and standing within the governance architecture.

3.2 Exclusion Protocol Management

The GLIEL governs the process by which entities are formally excluded from the Δ CS governance architecture. Exclusion is the most consequential action within the GLIEL's authority and is executed only through complete procedural compliance. The full Exclusion Protocol is set out in Section 8.

Exclusion categories recognised by the GLIEL are as follows:

Code	Exclusion Category	Description
(a)	Voluntary Withdrawal	An entity exits Δ CS by its own election, through a formal withdrawal process.
(b)	Performance Exclusion	An entity is excluded following sustained failure to meet governance standards, as assessed by Layer 6 and reported through the Governance Cycle Close Report (GCCR).
(c)	Integrity Exclusion	An entity is excluded following a confirmed integrity breach, verified by independent audit and reported through a Critical Governance Integrity Alert (GIA) from Layer 6.
(d)	Structural Exclusion	An entity is excluded because the governance architecture no longer

Code	Exclusion Category	Description
		includes its participation category, following a structural change to the Δ CS governance stack.

3.3 Suspension and Reinstatement

The GLIEL governs the temporary suspension of a participant's standing as a distinct and separate instrument from permanent exclusion. Suspension is the intermediate mechanism between active standing and exclusion, and is always preferred where the conditions for remediation remain credibly achievable.

All suspensions are time-bound, condition-specific, and carry a defined reinstatement pathway. The full Suspension and Reinstatement Protocol is set out in Section 9.

Reinstatement from suspension requires the concurrent satisfaction of three conditions:

7. Fulfillment of all conditions specified in the Suspension Order (SO).
8. A formal clearance assessment issued by the Evaluation Layer (Layer 6).
9. GLIEL ratification of reinstatement, issued by the GLIEL Chair.

3.4 Structural Architecture Authority

The GLIEL holds ultimate authority over the structure of the Δ CS governance stack itself. This authority extends to the creation, merger, suspension, and dissolution of individual governance layers — decisions that alter the fundamental architecture of Δ CS and carry the most far-reaching governance consequences.

Structural decisions of this nature require either:

10. A formal Structural Review Recommendation from the Evaluation Layer (Layer 6), supported by documented evidence; or

11.A supermajority governance mandate from the full Δ CS governance membership.

All structural changes to the governance stack are formally logged in the Structural Architecture Register (SAR). The full Structural Architecture Authority protocol is set out in Section 10.

3.5 Sovereignty Review

The GLIEL conducts periodic self-review of its own exercise of authority — a function designated the Sovereignty Review. Sovereignty Reviews assess whether invitation and exclusion decisions, over the preceding review period, remain consistent with Δ CS founding principles and with the procedural requirements of this document.

Sovereignty Reviews are the only form of internal review conducted at the apex layer. External review of GLIEL authority is conducted by a designated independent body ratified by the full governance membership, in accordance with Section 12. Findings of each Sovereignty Review are published in the Sovereignty Review Report (SRR) and made available to all Δ CS registered entities.

4. Structural Components

The GLIEL operates through six formal instruments and registers. Each is described below, together with its custodial and retention requirements.

Component	Code	Description and Requirements
Δ CS Membership Register	MR	The authoritative, version-controlled register of all entities with recognised standing in Δ CS. Records entity identity, standing category (Discipline, Governance Body, Framework,

Component	Code	Description and Requirements
		Partner, Participant Class), and current status (Active, Suspended, Excluded). Updated within five working days of any status change. Custodian: GLIEL Secretariat.
Invitation Dossier	ID	The formal submission package required for any invitation consideration. Must specify: entity description and identity, category of invitation, alignment with ΔCS founding principles, sponsoring body, and supporting evidence. Prepared by the nominated entity or sponsoring body. Reviewed for completeness by the GLIEL Secretariat within five working days of submission.
Exclusion Record	ER	A formal, permanent record of all exclusion decisions. Each Exclusion Record contains: entity identity, exclusion category and grounds, summary of deliberation, panel composition, effective date, and any conditions for future invitation eligibility. Exclusion Records are retained indefinitely and may not be expunged. Custodian: GLIEL Secretariat.
Suspension Order	SO	A time-bound formal instrument specifying: entity subject to

Component	Code	Description and Requirements
		suspension, grounds for suspension, specific conditions required for reinstatement, maximum suspension duration, and the scheduled review timeline. Suspension Orders are signed by the GLIEL Chair and served on the entity within two working days of the GLIEL decision. Reviewed at maximum every 90 days.
Structural Architecture Register	SAR	A permanent register of all changes to the ΔCS governance stack structure. Each entry records: the nature of the structural change, full rationale, recommending body or mandate reference, effective date, and transition provisions. Updated within five working days of any structural change. Custodian: GLIEL Chair and GLIEL Secretariat (co-custodianship).
Sovereignty Review Report	SRR	A periodic self-evaluation of GLIEL authority exercise against ΔCS founding principles. Produced annually. Commissioned by the GLIEL and conducted by the independently appointed External Review Body. Findings distributed to all registered ΔCS entities upon completion. Retained permanently. Custodian: GLIEL Secretariat.

5. Operating Principles

The following seven principles govern all GLIEL decisions, procedures, and conduct. They are not aspirational guidelines — they are binding constraints on the exercise of GLIEL authority. Any decision found to be inconsistent with these principles is subject to mandatory Sovereignty Review.

#	Principle	Definition and Implications
1	Sovereignty	GLIEL decisions are final within Δ CS. No lower layer, body, or instrument may override, nullify, or countermand a GLIEL decision. External challenge mechanisms are exclusively defined in the Δ CS Founding Charter and may not be invoked by any internal Δ CS body or layer.
2	Deliberateness	No invitation or exclusion is executed without full procedural compliance with the protocols set out in this document. Urgency, operational pressure, or seniority of the subject entity does not excuse, abbreviate, or waive any procedural step. Emergency protocols — where they exist — are themselves fully defined procedures, not exceptions to procedure.
3	Proportionality	Exclusion is a last resort. Before any exclusion decision, the GLIEL must consider and, where structurally feasible, pursue suspension, remediation,

#	Principle	Definition and Implications
		and reinstatement pathways. Irreversible exclusion is reserved exclusively for integrity breaches of the highest severity, where no remediation pathway is credible or safe for the governance architecture.
4	Transparency	All GLIEL decisions are recorded in the relevant register or instrument, communicated in writing to all directly affected parties, and reflected in the Membership Register. Grounds for exclusion and suspension are stated without ambiguity. No decision is communicated verbally without simultaneous written record. The Sovereignty Review Report is shared with all registered Δ CS entities.
5	Equity	Invitation and exclusion procedures apply equally to all entities, regardless of seniority, organisational size, duration of membership, strategic importance, or historical contribution to Δ CS. No entity is exempt from procedural requirements. No entity receives procedural advantages not available to all entities.
6	Reversibility	Where structurally and procedurally possible, exclusion decisions include formal review conditions and, where applicable, a pathway

#	Principle	Definition and Implications
		for future invitation. Irreversible exclusion — meaning exclusion without any defined conditions for future eligibility — is reserved for integrity breaches of the most severe category, as defined in Section 8.
7	Founding Fidelity	All GLIEL decisions are evaluated for consistency with Δ CS founding principles, as recorded in the Δ CS Founding Charter. Any decision that may be inconsistent with those principles is flagged for mandatory Sovereignty Review. Founding principles are not amended by GLIEL decision; amendment of founding principles requires the process defined in the Δ CS Founding Charter.

6. Invitation Protocol (Detailed)

The Invitation Protocol consists of four sequential stages. Progression through stages is not automatic; each stage must be formally completed before the next is initiated. Timelines specified below are binding unless the GLIEL Chair issues a documented extension with stated grounds.

Stage 1 — Nomination

12. Any entity with registered, Active standing in the Δ CS Membership Register may nominate a candidate for invitation.

13. Nomination must specify: candidate identity, the relevant invitation category (see Section 3.1), and a preliminary rationale of sufficient particularity for the GLIEL Secretariat to confirm completeness.
 14. Nominations are submitted to the GLIEL Secretariat in writing.
 15. The GLIEL Secretariat acknowledges receipt and confirms nominal completeness within **five working days** of receipt.
 16. An incomplete nomination is returned to the nominating entity with written specification of the deficiency. A corrected nomination may be resubmitted at any time.
-

Stage 2 — Dossier Preparation and Submission

17. Following nomination acknowledgement, the nominated entity (or a sponsoring body acting formally on their behalf) prepares and submits a complete Invitation Dossier (ID) within **30 calendar days** of acknowledgement.
 18. The Invitation Dossier must satisfy all requirements defined in Section 4 (Structural Components — ID).
 19. The GLIEL Secretariat confirms dossier completeness within **five working days** of submission. An incomplete dossier is returned with written specification of deficiencies.
 20. Failure to submit a dossier within 30 calendar days without prior written extension request to the GLIEL Secretariat results in the nomination lapsing. A new nomination may be submitted after **six months** from the lapse date.
-

Stage 3 — Deliberation

21. The GLIEL convenes a Deliberation Panel within **15 working days** of dossier confirmation.

22. Panel composition:

- GLIEL Chair (convening authority)
- Two senior governance representatives, drawn from the registered Δ CS governance membership
- One delegate from the Evaluation Layer (Layer 6)
- One representative from the governance layer most proximate to the proposed invitation category

23. The panel deliberates using the Δ CS Invitation Criteria set out in Section 7. Each criterion is assessed independently and recorded.

24. The nominated entity (or their sponsoring body) may be invited to address the panel in writing prior to deliberation; oral representations are not permitted in the standard protocol.

25. The panel issues an **Invitation Decision** from one of four categories:

- **Approved** — the entity satisfies all Invitation Criteria.
- **Approved with Conditions** — the entity satisfies the core Invitation Criteria but specific conditions apply to their participation, to be monitored by Layer 6.
- **Deferred** — the entity does not currently satisfy one or more Invitation Criteria; specific remediation requirements are stated, and the entity may resubmit a dossier once those requirements are met.
- **Declined** — the entity does not satisfy the Invitation Criteria and the conditions for future invitation are not currently met; written grounds are provided.

Stage 4 — Ratification and Registration

26. **Approved:** The GLIEL Chair ratifies the decision in writing. The entity is registered in the Membership Register as Active within **five working days**. A formal invitation notification is issued to the entity and to the full Δ CS membership.
27. **Approved with Conditions:** The GLIEL Chair ratifies the decision. Conditions are logged in the Membership Register alongside the entity's Active status. Layer 6 is formally notified and tasked with compliance monitoring. Conditions remain on record until formally discharged by GLIEL following a Layer 6 compliance confirmation.
28. **Deferred:** Written grounds and remediation requirements are communicated to the nominating entity and the nominated candidate. No Exclusion Record is created. The entity may resubmit a dossier upon satisfaction of stated requirements.
29. **Declined:** Written grounds are communicated to the nominating entity within **five working days** of the panel decision. The nominating entity may re-nominate after **12 months** with new or materially updated evidence (see Section 14).

7. Δ CS Invitation Criteria

All entities under invitation consideration are evaluated against the five criteria below. Each criterion is assessed independently by the Deliberation Panel and recorded in the panel's deliberation record. An Approved decision requires that the entity satisfies all five criteria. An Approved with Conditions decision indicates that one or more criteria are satisfied with qualification. A Declined decision requires that the panel record, with specificity, which criteria are not satisfied and why.

#	Criterion	Description
1	Principled Alignment	The entity's purpose, operating methods, and values are aligned with Δ CS founding principles, as documented in the Δ CS Founding Charter. Principled Alignment is assessed in substance, not merely in formal declaration. Evidence of alignment is required; self-attestation alone is insufficient.
2	Governance Maturity	The entity demonstrates the organisational capacity, governance structures, and operational discipline required to participate within the Δ CS governance architecture's requirements. Governance Maturity includes: defined decision-making processes, accountability mechanisms, and demonstrated capacity for structured engagement with formal governance systems.
3	Complementary Contribution	The entity offers a genuine, substantive contribution to the Δ CS architecture that is not redundant with the roles, functions, or contributions of existing participants. Complementarity is assessed against the current composition of the Membership Register and the expressed needs of the governance stack, as reported by Layer 6.

#	Criterion	Description
4	Structural Fit	The entity's operating mode, participation model, and institutional character are compatible with the governance layer(s) in which it is proposed to function. Structural Fit includes compatibility of governance cadence, reporting obligations, and decision-participation modalities.
5	Sustainable Participation	The entity has demonstrated, or credibly projected, the capacity for sustained, reliable, and active participation within Δ CS over the medium to long term. This criterion addresses resource sufficiency, institutional continuity, and commitment of senior leadership to governance engagement. Credible projection, where direct demonstration is not yet possible, must be supported by a structured participation commitment plan.

AMENDMENT NOTE

The Δ CS Invitation Criteria may only be amended by supermajority governance mandate, following a mandatory Sovereignty Review assessing the proposed amendment's consistency with Δ CS founding principles. No GLIEL Deliberation Panel may modify or disapply these criteria for a specific invitation decision.

8. Exclusion Protocol (Detailed)

The Exclusion Protocol varies by exclusion category. Each category is set out separately below. All exclusion decisions, regardless of category, result in a permanent Exclusion Record (ER) and an update to the Membership Register. The GLIEL Chair ratifies all exclusion decisions.

8.1 Voluntary Withdrawal

30. An entity wishing to withdraw from Δ CS submits a formal **Withdrawal Notice** to the GLIEL Secretariat in writing.
31. A **30-calendar-day notice period** commences upon receipt. During this period, the GLIEL reviews the withdrawal's implications for the governance architecture, for any conditions attached to the entity's membership, and for any ongoing governance processes in which the entity holds a role.
32. The GLIEL may, within the notice period, request a formal meeting with the withdrawing entity to discuss transition arrangements. Such a request does not delay the effective date of withdrawal beyond the 30-day period unless the entity agrees to an extended notice period in writing.
33. At the close of the notice period, the GLIEL Secretariat records the withdrawal in the Membership Register (status: Excluded — Voluntary Withdrawal) and creates an Exclusion Record.
34. Voluntary Withdrawal does not preclude future invitation. A previously withdrawn entity may be nominated for invitation at any time; their prior membership and the circumstances of withdrawal are material considerations for the Deliberation Panel.

8.2 Performance Exclusion

35. Performance Exclusion is triggered by an **At Risk** rating sustained across **two consecutive governance cycle evaluations**, as assessed by the Evaluation Layer (Layer 6) and formally reported in the Governance Cycle Close Report (GCCR).
36. Upon receipt of a triggering GCCR, the GLIEL Secretariat notifies the subject entity in writing within **five working days**. The notification specifies the trigger, the GCCR reference, and the entity's right to submit a Remediation Proposal.
37. The GLIEL convenes a **Performance Review Panel** within **15 working days** of the trigger notification. Panel composition:
- GLIEL Chair (convening authority)
 - Two senior governance representatives
 - One Layer 6 delegate (who presents the GCCR findings)
38. The subject entity has the right to submit a **Remediation Proposal** to the GLIEL Secretariat within **10 working days** of the trigger notification. A submitted Remediation Proposal is presented to the Performance Review Panel as part of its deliberations.
39. The Performance Review Panel issues one of three decisions:
- **Remediation Order:** The entity is given a defined remediation period and specific performance targets. Monitoring is conducted by Layer 6 and reported to the GLIEL at the close of the remediation period.
 - **Suspension:** The entity's standing is suspended pending remediation; a Suspension Order is issued (see Section 9).
 - **Exclusion:** The entity is formally excluded. Grounds are documented in full in the Exclusion Record.

8.3 Integrity Exclusion

40. Integrity Exclusion is triggered by a **confirmed Critical Governance Integrity Alert (GIA)** issued by Layer 6 following an independent audit that confirms a material integrity breach.
41. The GLIEL Secretariat notifies the subject entity in writing within **two working days** of receiving the GIA. The notification specifies the GIA reference, the nature of the confirmed breach, and the entity's right to submit a written response.
42. The GLIEL convenes an **Emergency Integrity Panel** within **five working days** of receiving the GIA. Panel composition:
- GLIEL Chair (convening authority)
 - Two senior governance representatives (neither of whom holds a conflict of interest with the subject entity)
 - One Layer 6 delegate (who presents the GIA and audit findings)
 - One independent governance advisor (where available within the response timeline)
43. The subject entity has the right to submit a **written response** to the GLIEL Secretariat within **five working days** of the panel convening. The written response is presented to the Emergency Integrity Panel before it issues its decision.
44. The Emergency Integrity Panel issues one of two decisions:
- **Suspension pending full investigation:** The entity's standing is suspended while a comprehensive investigation is completed. A Suspension Order is issued specifying the investigation timeline. Upon completion of the investigation, the GLIEL reconvenes to issue a final decision.
 - **Immediate Exclusion:** Reserved for breaches of the most severe nature, where the evidence from the independent audit is unambiguous, where

continuation of the entity's standing poses a material risk to the integrity of the Δ CS governance architecture, and where no remediation pathway is credible. Grounds are documented in full in the Exclusion Record. The GLIEL Chair may designate this an **Irreversible Exclusion** where the severity of the breach warrants the removal of future invitation eligibility.

45. All deliberations, evidence considered, and findings are documented in the Exclusion Record, regardless of the decision issued.

8.4 Structural Exclusion

46. Structural Exclusion occurs when a change to the Δ CS governance stack results in the removal of a participation category in which one or more entities hold standing.

47. Structural Exclusion is not a punitive action. It reflects a structural change to the governance architecture rather than any finding about the excluded entity's conduct or performance.

48. All entities subject to Structural Exclusion are formally notified by the GLIEL Secretariat **no fewer than 60 calendar days** before the structural change takes effect.

49. During the 60-day notice period, the GLIEL considers and, where structurally feasible, provides transition support to affected entities. Transition support may include: recognition within a proximate participation category, a defined wind-down period, or a facilitated handover of governance responsibilities.

50. Structural Exclusion does not preclude future invitation to any reconstituted or alternative participation category. Excluded entities are recorded in the Membership Register (status: Excluded — Structural) and an Exclusion Record is created for administrative completeness.

9. Suspension and Reinstatement Protocol

9.1 Suspension

A Suspension Order (SO) is a formal, time-bound instrument issued by the GLIEL Chair. Every Suspension Order must specify, without exception:

51. The identity of the suspended entity.
52. The grounds for suspension, stated with sufficient particularity for the entity to understand what is required of them.
53. The specific conditions that must be fulfilled for reinstatement to be considered.
54. The maximum duration of the suspension, after which, if reinstatement conditions have not been met, the entity is automatically referred to the GLIEL for exclusion deliberation.
55. The reinstatement review timeline, including scheduled review points (no less frequent than every 90 days).

A suspended entity retains **no active governance rights** during the period of suspension. This includes, without limitation: voting rights, deliberation participation, nomination rights, and access to restricted governance information. A suspended entity retains the right to communicate with the GLIEL Secretariat regarding their Suspension Order.

Suspension is recorded in the Membership Register as: **Suspended**, with the Suspension Order reference and effective date.

9.2 Reinstatement

Reinstatement from suspension requires the concurrent satisfaction of all three of the following conditions:

56. **Condition Fulfillment:** The suspended entity must demonstrate, to the satisfaction of the GLIEL, that all conditions specified in the

Suspension Order have been fulfilled. Evidence of fulfillment is submitted to the GLIEL Secretariat in writing.

57. Layer 6 Clearance: The Evaluation Layer (Layer 6) must issue a formal clearance assessment confirming that the conditions for reinstatement have been met and that the entity's reinstatement presents no identified risk to the governance architecture.

58. GLIEL Ratification: The GLIEL Chair formally ratifies the reinstatement decision. Ratification is not automatic upon satisfaction of the preceding two conditions; the GLIEL Chair must affirmatively confirm that reinstatement is appropriate.

Upon ratification of reinstatement, the entity's status in the Membership Register is updated to **Active**. The Suspension Order is marked as discharged, and the entity is notified in writing. Any conditions attached to the original invitation (where applicable) are reviewed and either confirmed or updated at the point of reinstatement.

9.3 Failure to Meet Reinstatement Conditions

A suspended entity that fails to meet reinstatement conditions within the maximum suspension duration specified in the Suspension Order is referred to the GLIEL for exclusion deliberation. The GLIEL convenes a panel in accordance with the applicable exclusion protocol (Performance Exclusion or Integrity Exclusion, as relevant) within **10 working days** of the maximum suspension duration elapsing.

10. Structural Architecture Authority

All structural decisions made under this section are logged in the Structural Architecture Register (SAR) with full rationale, effective date, and transition provisions. The SAR is a permanent record and entries may not be removed or altered after registration.

10.1 Creation of a New Governance Layer

The GLIEL may create a new governance layer within the Δ CS stack upon either of the following:

- 59. A formal recommendation from Layer 6, documented in a Governance Cycle Close Report (GCCR), supported by evidence that a new governance function is required that cannot be adequately fulfilled by any existing layer; or
- 60. A supermajority governance mandate from the full Δ CS registered membership.

Creation of a new layer requires the GLIEL to define: the layer's designation, its position in the governance stack, its authority class, its core functions, and its interaction rules with adjacent layers, prior to the layer becoming operative.

10.2 Merger of Existing Governance Layers

The GLIEL may merge two existing governance layers upon the concurrent satisfaction of both of the following:

- 61. Demonstrated functional overlap between the two layers, confirmed by a formal assessment from Layer 6; and
- 62. Ratification of the merger by all layers directly affected by the change.

Merger decisions must include a defined transition plan that addresses the standing of all entities registered within the affected layers, the disposition of all instruments and registers held by the merging layers, and the new layer's governance designation.

10.3 Suspension or Dissolution of a Governance Layer

The GLIEL may suspend or dissolve an existing governance layer upon either of the following:

- 63.Sustained At Risk performance confirmed by Layer 6 across **two consecutive governance cycles**, as reported in the GCCR; or
- 64.An emergency supermajority mandate from the full Δ CS registered membership.

Dissolution is irreversible. Suspension is time-bound and specifies the conditions under which the layer may be reinstated. Entities holding standing within a dissolved layer are subject to Structural Exclusion protocol (Section 8.4). All active governance functions of the dissolved or suspended layer are either redistributed to existing layers or placed in abeyance pending structural review.

10.4 Structural Architecture Register Maintenance

Every structural change — creation, merger, suspension, or dissolution — is logged in the SAR within **five working days** of the GLIEL Chair's ratification. Each SAR entry is co-signed by the GLIEL Chair and the GLIEL Secretariat. Entries are version-controlled and timestamped. The SAR is available to all registered Δ CS entities upon request to the GLIEL Secretariat.

11. Interaction Rules

11.1 Inputs to the GLIEL

Source	Input Type and Purpose
Governance-Level Evaluation Layer (Layer 6)	Governance Cycle Close Reports (GCCRs), Critical Governance Integrity Alerts (GIAs), structural recommendations, Layer 6 clearance assessments for reinstatement. Layer 6 is the primary intelligence source for GLIEL decisions requiring performance or integrity assessment.
Any registered Δ CS entity (Active standing)	Nominations for invitation, Invitation Dossiers, Withdrawal Notices, Remediation Proposals, written

Source	Input Type and Purpose
	responses to suspension or exclusion proceedings, reinstatement condition fulfillment evidence.
Governance deliberative bodies	Supermajority mandates for structural changes, emergency structural mandates, ratification decisions for independent review body appointments.
External Review Body	Annual Sovereignty Review Report, findings, and recommendations regarding GLIEL authority exercise.

11.2 Outputs from the GLIEL

Recipient	Output Type and Purpose
All Δ CS registered entities	Membership decisions (invitation, exclusion, reinstatement notifications), Suspension Orders, Exclusion Records (summaries), Sovereignty Review Reports. All entities are notified of changes to the Membership Register that affect governance-wide standing.
Governance deliberative bodies	Structural Architecture decisions, Sovereignty Review Reports, GLIEL self-evaluation commission terms.
Governance-Level Evaluation Layer (Layer 6)	Formal notifications of structural changes requiring evaluation adjustment, commission of GLIEL self-evaluation processes, conditions attached to Approved with Conditions invitation decisions requiring Layer 6 monitoring.
External Review Body	Commission terms for annual Sovereignty Review, access to GLIEL records and registers required for independent review.

APEX POSITION NOTICE

No layer above the GLIEL exists within Δ CS. External challenge mechanisms — including any process by which a GLIEL decision may be reviewed or overturned by an authority outside the Δ CS governance stack — are exclusively defined in the Δ CS Founding Charter. No internal Δ CS body, layer, or instrument may constitute itself as an appellate authority over GLIEL decisions.

12. Cadence and Review

Function / Instrument	Cadence and Timeline
Invitation decisions	Rolling — initiated by nomination at any time. Stage timelines as defined in Section 6.
Membership Register updates	Within five working days of any status change (invitation, suspension, reinstatement, exclusion, or Approved with Conditions condition discharge).
Suspension Order reviews	At a maximum interval of every 90 calendar days from the date of the Suspension Order.
Sovereignty Reviews	Annually. Commissioned by the GLIEL and conducted by the independently appointed External Review Body. The Sovereignty Review Report is distributed to all registered Δ CS entities upon completion.
Structural Architecture Register updates	Within five working days of any structural change, co-signed by the GLIEL Chair and GLIEL Secretariat.
External Review Body appointment	Every three years, or upon vacancy, by full governance membership ratification.
Exclusion Records and SAR entries	Retained permanently; no expungement or alteration after registration.

13. Roles and Accountabilities

Role	Accountabilities and Authority
GLIEL Chair	Holds ultimate authority over all GLIEL operations. Ratifies all invitation, suspension, and exclusion decisions. Signs all Suspension Orders. Co-signs all Structural Architecture Register entries. Convenes all deliberation, review, and integrity panels. Recuses from any appeal panel reviewing their own original decision (see Section 14). Accountable to the full Δ CS governance membership through the Sovereignty Review process.
Deliberation and Review Panels	Convened on a per-decision basis by the GLIEL Chair. Composition varies by decision type as specified in Sections 6 and 8. Panels are decision-recommending bodies; final ratification rests with the GLIEL Chair. Panel members serve in an individual, expert capacity and may not act as proxies for the entities they represent in relation to the specific decision under deliberation.
GLIEL Secretariat	Manages all administrative functions of the GLIEL. Responsibilities include: receipt and completeness assessment of all formal submissions (nominations, dossiers, withdrawal notices, remediation proposals, written responses), panel scheduling and logistics, maintenance and version control of all registers and records (MR, ID, ER, SO, SAR, SRR), communication logistics for all GLIEL decisions, and compliance tracking of conditions attached to Approved with Conditions decisions in coordination with Layer 6.
External Review Body	Appointed by full governance membership ratification for a three-year term. Conducts annual Sovereignty Reviews of GLIEL

Role	Accountabilities and Authority
	authority exercise. Operates independently of the GLIEL; may not be directed, instructed, or constrained by the GLIEL Chair in its findings. Issues Sovereignty Review Reports. May make recommendations; cannot issue binding directions to the GLIEL. Renewal of appointment requires full governance membership re-ratification.
Evaluation Layer (Layer 6)	Provides evaluation intelligence to the GLIEL. Issues GCCRs, GIAs, clearance assessments, and structural recommendations. Monitors compliance conditions attached to Approved with Conditions decisions and reports findings to the GLIEL Secretariat. The Evaluation Layer is an input provider to, not a deliberative member of, the GLIEL — except where a Layer 6 delegate participates in a panel as specified in Sections 6 and 8.

14. Appeals and External Challenge

14.1 Re-Nomination Following Declined Invitation

An entity whose invitation has been Declined may be re-nominated after **12 months** from the date of the Declined decision. Re-nomination must be supported by new or materially updated evidence that addresses the specific grounds stated in the Declined decision. A re-nomination that does not address the stated grounds may be returned by the GLIEL Secretariat without commencing Stage 1 of the Invitation Protocol.

14.2 Appeal of Exclusion Decisions

An entity subject to an exclusion decision (excluding Voluntary Withdrawal and Structural Exclusion) may appeal the decision to an **Independent Review Panel** constituted under the Δ CS Founding Charter.

65. Notice of appeal must be submitted in writing to the GLIEL Secretariat within **30 calendar days** of the exclusion decision being communicated.
66. An appeal does not automatically stay the exclusion; the excluded entity's status in the Membership Register remains Excluded unless the Independent Review Panel issues a stay of the decision pending review.
67. The Independent Review Panel is constituted in accordance with the Δ CS Founding Charter and operates independently of the GLIEL.
68. The **GLIEL Chair recuses** from any Independent Review Panel in which their original decision is under review.
69. The Independent Review Panel's findings are binding. A finding that an exclusion decision was procedurally deficient or inconsistent with Δ CS founding principles requires the GLIEL to reconvene and issue a fresh decision in accordance with the corrected procedure.

14.3 Challenge to Structural Architecture Decisions

A structural architecture decision made under Section 10 may be challenged by a **supermajority of the full Δ CS registered membership** within **60 calendar days** of the decision being formally communicated to the membership.

A successful supermajority challenge requires the GLIEL to convene a full Structural Architecture Review within **30 working days**. The outcome of that review — which may affirm, modify, or reverse the challenged decision — is final and not subject to further challenge within the same governance cycle.

14.4 GLIEL Chair Recusal

The GLIEL Chair recuses from any panel, appeal, or review process in which their own original decision, conduct, or recommendation is the

subject of deliberation. In circumstances requiring Chair recusal, the most senior available governance representative present in the relevant panel assumes the convening authority role for that process only.

15. Amendment Conditions

The provisions of this document carry differing amendment thresholds, reflecting the varying constitutional weight of each provision. Amendment thresholds are listed below in ascending order of protection:

Provision	Amendment Threshold	Additional Requirements
GLIEL operating procedures (Sections 6, 9, 12, 13)	Supermajority governance mandate	Mandatory 30-calendar-day consultation period open to all registered Δ CS entities prior to ratification.
Δ CS Invitation Criteria (Section 7)	Supermajority governance mandate	Mandatory Sovereignty Review assessing the proposed amendment's consistency with Δ CS founding principles, prior to governance mandate vote.
Operating Principles (Section 5)	Supermajority governance mandate	Mandatory Sovereignty Review and mandatory 30-calendar-day consultation period. No amendment may reduce the scope of any principle without a concurrent amendment to the Δ CS Founding Charter.
Exclusion Protocol (Section 8) — due process protections	Unanimous governance membership ratification	No amendment may remove, reduce, or circumvent due process protections (including notification rights, response rights, and panel composition requirements) for any

Provision	Amendment Threshold	Additional Requirements
		entity, under any circumstance.
Structural Architecture Authority provisions (Section 10)	Unanimous governance membership ratification	No amendment to the conditions under which layers may be created, merged, suspended, or dissolved may be made except by unanimous ratification. Unanimous ratification requires the recorded assent of every entity with Active standing in the Membership Register at the time of the vote.

AMENDMENT CONSTRAINT — FOUNDING FIDELITY

No amendment to this document, at any threshold, may result in provisions inconsistent with the Δ CS Founding Charter or Δ CS founding principles. Any proposed amendment that would create such inconsistency is invalid regardless of the governance mandate achieved. The External Review Body shall be consulted on any proposed amendment to sections governing its own appointment, independence, or authority.

Document ID: Δ CS-GOV-L7-GLIEL | **Version:** 1.0 | **Status:** Active | **Effective**
Date: July 2026 | **Classification:** Governance Framework — Restricted
Custodian: GLIEL Chair / GLIEL Secretariat | **Review Cycle:** Annual (Sovereignty Review)
| **Layer:** 7 — Apex (Δ CS Governance Stack)

Revision Tracking Guidance: All amendments to this document must be ratified in accordance with the Amendment Conditions defined in Section 15. Upon ratification, the GLIEL Secretariat issues an updated version of this document with an incremented version number, a summary of changes, the ratifying mandate reference, and the new effective date. Previous versions are retained in the Structural Architecture Register for permanent reference. No provision of this

document may be amended informally or by practice; only formally ratified versions carry governance authority.

Version	Effective Date	Amendment Summary	Ratifying Mandate	Custodian Sign-Off
1.0	July 2026	Initial Issue — Governing instrument for Δ CS Layer 7 (GLIEL). No prior version.	Δ CS Founding Governance Mandate	GLIEL Chair
<i>[Next version]</i>	<i>[To be recorded]</i>	<i>[To be recorded upon ratification]</i>	<i>[Mandate reference]</i>	<i>[GLIEL Chair]</i>

Δ CS-GOV-L7-GLIEL v1.0 — Governance Framework — Restricted — Triangulated Coherent Systems — Apex Governance Authority — July 2026 — This document is the apex governance instrument of Δ CS. Unauthorised reproduction, distribution, or amendment outside the procedures defined herein is a governance integrity breach subject to the protocols of this document.
